While traditional RPS is player-versus-player (PvP), gambling establishment versions typically operate as **player-versus-house (PvH)** or use a peer-to-peer tournament structure hosted by the platform.

Standard Casino RPS Rules

2. **The Countdown:** An integrated timer counts down (normally 3 seconds). In digital casinos, the gamer locks in their option before the dealer or computer system exposes theirs.
3. **The Payouts:** Unlike standard gambling establishment games where odds dictate payouts, RPS typically uses a multiplier system based upon streaks or specific win conditions.

- **Tournament Play:** Multiple players purchase into a bracket-style competition hosted by the gambling establishment, where the last person standing takes the prize swimming pool.

The Mathematics and House Edge
