What is the Limbo Casino Game?

Originating in the crypto-casino sector (promoted by platforms like Stake), Limbo is a specific betting game influenced by the timeless "Crash" mechanic. However, whereas Crash includes a rising multiplier line that gamers need to leave before it suddenly crashes, Limbo cuts straight to the chase.

In Limbo, players set a **target multiplier** and position a wager. The game then instantly produces a random multiplier result. If the generated multiplier is *equivalent to or greater* than the player's target, the bet wins. If it fails, the bet is lost.

The appeal of Limbo lies in its pure minimalism. There are no messy reels, complex paylines, or distracting storylines-- simply raw possibilities and instant results.
