Coin Flip

This is the simplest and most regular perk round. The host steps up to a maker that turns a coin with a **Red** side and a **Blue** side.

- Before the flip, random multipliers are appointed to each side of the coin.
- Whichever color lands deal with up figures out the winning multiplier for all gamers who wager on Coin Flip.

Money Hunt

Money Hunt takes gamers to an enormous digital screen including a shooting gallery filled with 108 random multipliers.

- Each multiplier is concealed behind a different sign (such as a cactus, target, or chef's hat).
- Players are given a minimal time to goal and fire a cannon at a sign of their choice.
- When time ends, the hidden multipliers are revealed, and each player receives the multiplier behind their chosen target.

Pachinko

Motivated by the standard Japanese arcade game, Pachinko includes a large physical board filled with pegs.

- The host drops a glowing puck from the top of the board.
- The puck bounces arbitrarily down through the pegs till it lands in among several multiplier slots at the bottom.
- If the puck arrive on a **"Double"** worth, all multipliers at the bottom of the board double, and the host drops the puck again for even larger wins.

Crazy Time

The holy grail of the game, the **Crazy Time** benefit round, leads gamers behind a red door into a lively, surreal virtual world including a massive 64-segment wheel.

- Players should choose among three flappers: **Green, Blue, or Yellow**.
- The host presses a giant red button to spin the wheel.
- Whichever section the chosen flapper indicate is the multiplier the gamer wins.

- Similar to Pachinko, this wheel consists of "**Double**" and "**Triple**" segments, which can send out multipliers escalating up to the game's optimum limit of 20,000 x or 25,000 x.

Tips and Strategies for Playing Crazy Time

While Crazy Time is a video game of pure chance governed by a Random Number Generator (RNG) and physical physics, gamers typically use particular wagering methods to handle their danger and extend their gameplay sessions.

- **The Low-Risk Strategy:** Cover the numbers (primarily 1 and 2) while placing a small hedge bet on a couple of bonus rounds. This technique intends to protect regular little wins to sustain the bankroll while keeping a shot at triggering a benefit.
- **The Bonus-Hunter Strategy:** Bet solely on the four bonus rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). This technique accepts that number hits will lead to losses, but guarantees that whenever a perk round is triggered, the player is ensured participation.
- **Bankroll Management:** Set a rigorous budget plan before entering the live casino lobby. Because the video game moves quickly, it is simple to misplace costs throughout exciting bonus rounds.
- **See the Top Slot:** Pay attention to the Top Slot multiplier that spins together with the main wheel. When a number or reward lines up with a high multiplier in the Top Slot, possible payments multiply tremendously.
