As the airplane climbs up higher into the stratosphere, a multiplier coefficient begins to increase from 1.00 x upwards. The main goal is deceptively simple: **cash out before the aircraft crashes or flies away**.

If a gamer successfully cashes out before the crash event, they win their preliminary stake increased by the current coefficient. If the airplane crashes before they struck the cash-out button, the stake is lost.

Core Game Mechanics: How It Works

- **Manual vs. Auto Cash-Out:** Players can select to manually click the cash-out button at their wanted minute, or they can set a vehicle cash-out threshold. For instance, setting it to 2.00 x implies the system will automatically collect profits if the plane reaches that multiplier.
- **Dual Betting Panels:** Many versions of Avia Masters permit players to position 2 separate bets simultaneously on the same round. This opens tactical possibilities, such as squandering one bet early to protect revenue while letting the second bet ride for a greater multiplier.
