Once betting closes, the live host spins the giant wheel. All at once, a separate two-reel slot placed above the main wheel-- called the **Top Slot**-- spins alongside it.

The Top Slot Mechanism

Before the wheel stops, the Top Slot produces a random multiplier and appoints it to among the 8 wagering alternatives on the wheel.

- If the Top Slot multiplier and the wheel outcome align on the very same section, the multiplier applies to that win.
- If the outcome is a reward game, the multiplier boosts all the multipliers *inside* that specific reward round, leading to possibly huge payments.

Dive Into the Four Crazy Time Bonus Rounds

1. Coin Flip

The most basic of the four bonuses, this round includes a coin with a red side and a blue side.

- Each side is assigned a random multiplier before the flip.
- The host presses a button to turn the coin, and whichever color lands face-up awards the corresponding multiplier to the player's bet.

2. Money Hunt

This is a huge interactive shooting gallery including a screen with 108 random multipliers concealed behind various signs (like a cactus, target, or chef's hat).

- Players use a virtual crosshair to intend and contend a symbol of their option before a countdown timer expires.
- When time goes out, all symbols reveal their concealed multipliers, and the gamer wins whatever worth they shot.

3. Pachinko

Motivated by the standard Japanese arcade video game, Pachinko features a large wall filled with physical pegs.

- The host drops a puck from the top of the board.
- The puck bounces arbitrarily down the pegs till it lands in one of the slots at the bottom, which includes a multiplier.
- If the puck lands in a **"DOUBLE"** slot, all multipliers on the board double, and the puck is dropped again for an even bigger payout.

4. Crazy Time

The crown jewel of the game. When activated, the host opens a red door leading into a surreal, vibrantly colored virtual world featuring an enormous, 64-segment mega-wheel.

- Gamers need to pick one of 3 flappers: **Green, Blue, or Yellow**.
- The host spins the wheel, and the flapper the player picked determines their reward.
- This wheel includes **"DOUBLE"** and **"TRIPLE"** segments. If the flapper points to among these, all multipliers on the wheel increase, and the wheel spins once again-- permitting wins to scale up to the game's optimum cap of 500,000 x!

Methods for Playing Crazy Time
