### What Determines a Skin's Rarity?

CS: GO designates every skin to a **rarity class** that reflects its in-game drop likelihood:

Rarity Class	Approximate Drop Chance	Typical Quality	Customer Grade	~	80%	White	Industrial Grade	~	15%	Light Blue	Mil-Spec	~	4%	Blue	Restricted	~	2%	Purple	Classified	~	0.5%	Pink	Covert	~	0.25%	Red	Rare Special Item	<<	0.01%	(case-specific)	Gold (Gold)
--------------	-------------------------	-----------------	----------------	---	-----	-------	------------------	---	-----	------------	----------	---	----	------	------------	---	----	--------	------------	---	------	------	--------	---	-------	-----	-------------------	----	-------	-----------------	-------------

\* Drop chances are approximate and vary between weapon cases and operation collections.

Beyond the base rarity, a number of additional qualities press a skin into the "uncommon" category:

- Float Value**-- The lower the float (0.0-- 1.0), the cleaner the surface. Minimal wear (Factory New or Minimal Wear) frequently commands a premium.
- Pattern/StatTrak™**-- StatTrak™ skins (those that track eliminates) are generally scarcer than their vanilla equivalents.
- Case or Collection Age**-- Skins from ceased cases (e.g., *The Arms Deal* Case) become significantly limited as the case stops dropping.
- Occasion or Esports Origin**-- Limited-time tournament Souvenirs or products connected to specific majors (e.g., *Cobblestone* Souvenir) hardly ever reappear.
- Distinct Finishes**-- Special finishes such as *Fade*, *Case Hardened* (with a high blue gem pattern), or *Night Stripe* have an unique visual appeal that fuels need.
