Among the current additions to catch the attention of digital video gaming enthusiasts is the **Avia Masters Crash Game**.

What is a Crash Game?

Before diving into the specifics of Avia Masters, it helps to comprehend the underlying category. Crash video games are a modern-day style of online wagering and arcade-style entertainment. Unlike traditional games with established outcomes dictated by complex reel setups, crash video games focus on a single, central mechanic: **an increasing multiplier**.

In a common crash game:

1. Players position a wager before the round starts.
2. A multiplier starts at **1.00 x** and climbs up in real-time.
3. An object (in this case, an airplane) flies, and the multiplier increases the longer it remains in the air.
4. The object can "crash" or fly away at any unpredictable moment.
5. Players need to cash out *before* the crash to secure their profits multiplied by the existing rate. If the item crashes before a cash-out, the wager is lost.
