Handing this information over to an uncontrolled, confidential site is an open invite for identity theft.

3. Financial Loss

Scammers running these operations count on untraceable payment methods-- such as cryptocurrency, wire transfers, or gift cards. When the cash is sent out, the site generally vanishes, expresszkártya or the buyer gets a badly printed piece of plastic that can not pass even a fundamental visual evaluation, let alone electronic scanning by law enforcement.

The Reality of Government-Issued Identification

It is an axiom throughout nearly all modern-day legal systems: **No federal government agency outsources the printing and releasing of driver's licenses to third-party e-commerce sites.**

A valid driver's license needs:

1. **Identity Verification:** Presenting physical birth certificates, passports, or evidence of residency face to face.

If an online service claims they can bypass these actions because they have "expert connections" at the DMV, it is a conclusive scam.
