A lot of contractors and local business owners do not need a flashy website. They need a site that works on a phone, answers common questions, and helps turn calls and form fills into real leads. That is where a good website redesign and steady website maintenance matter.

Scalable Websites is a website design company based in Montgomery, TX, built for contractors, home service businesses, and local small businesses. The company was founded in January 2025, is veteran-owned, and is led by owner Preston Toor. The team brings 10+ years of experience and 200+ websites built for home service businesses.

If you are looking for a website designer Montgomery TX businesses can work with in person, the focus here is simple. Build a site that is easy to use, easy to manage, and set up to support day-to-day business needs.

Why a website redesign matters for service businesses

A website redesign is not just about changing colors or moving things around. For a contractor or home service company, the real point is to make the site easier for customers to use and easier for the business to manage.

When someone lands on your website, they usually want a few basic things right away. They want to know what you do, where you work, and how to contact you. They may also want to see reviews before they decide to call. A site that makes those steps simple can do a better job supporting your business.

Every site from Scalable Websites includes the practical features service-area businesses often need most:

- Click-to-call
- Google reviews shown on the site
- Custom lead forms with instant text and email alerts
- On-page SEO from day one
- Hosting and security

That setup is especially useful for contractor website design, because many leads come from people searching on their phones and trying to website designer montgomery tx reach someone fast. Mobile-first design is a big part of that. If the site is hard to read, slow to use, or confusing on mobile, people often move on.

For companies considering web design Montgomery TX or web design The Woodlands, a redesign can also be a chance to organize pages more clearly. Scalable Websites offers custom web design, website redesign, and custom WordPress websites, with plans built for different stages of business growth.

Ongoing website maintenance is not optional

A website is not something you launch once and forget about. Information changes. Service areas change. Photos, reviews, and contact details need updates. Security also needs attention in the background.

That is why website maintenance matters just as much as design. A nice-looking site does not help much if it goes down, gets outdated, or becomes a hassle every time you need a small change made.

Scalable Websites handles ongoing website maintenance with unlimited update requests, security updates, uptime monitoring, daily offsite backups, and a dedicated project manager. For a busy small business owner,

that can remove a lot of friction. Instead of trying to figure out website edits late at night, you have a system for keeping the site current.

This is especially helpful for small business website design, where owners often wear a lot of hats. If your website supports the business every day, it needs ongoing attention every day too.

Plans built around practical needs

Different businesses need different levels of support, so the plans are straightforward.

The Starter plan is $95 a month for a single-page site. The Growth plan is $195 a month and includes 3 to 5 pages, missed-call text-back, unlimited lead follow-up, Search Console, and Google Analytics. The AI Enhanced plan is $295 a month and includes 10+ pages, blogging, priority support, AI SMS and chat, and SEO citations.

Every plan includes a 6-month minimum, then goes month-to-month. There is also a 30-day money-back guarantee on signup. After 36 months, the client owns the site, and there is a free design refresh every 36 months.

Those details matter because they give business owners a clear picture of what they are getting. Whether you need a simple starting point or a larger site with more pages and support, the structure is easy to understand.

A local fit for contractors and service-area businesses

Scalable Websites works with trades including roofing, HVAC, plumbing, fire protection, fencing, concrete coatings, pools, septic, landscaping, remodeling, general contractors, and 30+ more. That makes sense for businesses that need lead-focused websites instead of something built like an online brochure.

The company meets clients in person across Montgomery County and greater Houston, including Montgomery, Magnolia, The Woodlands, Conroe, Willis, Spring, Tomball, Cypress, Kingwood, Humble, Houston, Katy, and Sugar Land. For local owners who want to sit down and talk through their website needs face to face, that local service area matters.

It is also worth noting that the company is a service-area business, not a walk-in office setup. The business hours are Monday to Friday, 8 AM to 5 PM, and the phone number is (832) 979-2478.

For contractors comparing web design Montgomery TX options, the value often comes down to whether the website is built around how the business actually operates. If you depend on calls, form leads, reviews, and mobile visitors, then your site should be set up around those priorities from day one.

Scalable Websites keeps that focus on practical tools, clear plans, and ongoing support. For a contractor or local service company, that can make the difference between having a website that just exists and one that stays useful month after month.

Scalable Websites, based in Montgomery, TX. (832) 979-2478.
