At its core, Aviator is a multiplayer social game built around an increasing multiplier curve that can "crash" anytime. Unlike traditional slots where a random number generator (RNG) figures out the outcome of a static spin, Aviator offers gamers a sense of agency.

The premise is stealthily easy:

1. An aircraft removes on the screen.
2. As the airplane climbs up higher, the multiplier connected to the gamer's bet increases.
3. The objective is to cash out before the airplane flies away (crashes).
4. If a player cashes out in time, they win their stake multiplied by the current coefficient. If the plane flies away before they squander, the bet is lost.

The game's aesthetic is intentionally minimalist, similar to early computer system graphics, which ensures it runs smoothly on both home computer and mobile gadgets without lagging.
