The main objective of the video game is simple: gamers place wagers on which sector the wheel will stop on after a spin. Nevertheless, what sets Crazy Time apart from basic wheel games (like *Dream Catcher*) is the addition of a **Top Slot** and **four interactive bonus video games** that deal massive payout potential.

The Wheel Breakdown

The Crazy Time wheel consists of 54 sectors. Each section represents either a number (1, 2, 5, or 10) or among the 4 reward video games. The circulation of the sectors on the wheel is outlined below:

Segment/ Outcome	Number of Segments on Wheel	Payment Odds
Number 1	21	1 to 1
Number 2	13	2 to 1
Number 5	7	5 to 1
Number 10	4	10 to 1

As the table reveals, numbers appear much more often on the wheel, while the benefit rounds are rarer, making them the most expected moments of any gaming session.

How a Round of Crazy Time Works

Every round of Crazy Time follows a structured, fast-paced series:

- 1. The Betting Phase:** Players are offered a minimal timeframe (normally around 15 seconds) to position their chips on one or more of the offered betting areas on the virtual design. Players can bank on numbers, benefit rounds, or a mix of both.
- 2. The Top Slot Spin:** Simultaneously while bets are being put, a two-reel slots placed directly above the main wheel spins immediately. The left reel exposes a bet area (number or benefit), and the right reel exposes a

multiplier (varying from 2x up to 50x). If the bet area and multiplier align, that multiplier is used to the sector for the upcoming spin.

3. **The Main Wheel Spin:** The live host spins the physical wheel.

4. **The Outcome:** When the wheel concerns a total halt, the guideline suggests the winning section.

- If it lands on a **Number**, all players who bank on that number get a payout according to the odds, increased by any Top Slot multiplier if relevant.
- If it arrive at a **Bonus Game**, the video game shifts to a separate, immersive benefit round.

Dive into the Four Bonus Rounds

The primary attraction of Crazy Time is undoubtedly its 4 perk features. These minigames provide the most considerable win potential and transport gamers into completely different virtual environments.

1. Coin Flip

- **Frequency:** 4 sectors on the wheel.
- **How it works:** A basic coin with a red side and a blue side is flipped by a mechanical flipper on the screen. Before the flip, random multipliers are appointed to both the red and blue sides. Whichever side lands deal with up wins for the player. If the multipliers are low, a "Rescue Flip" can in some cases be triggered for a second chance at higher multipliers.

2. Money Hunt

- **Frequency:** 2 segments on the wheel.
- **How it works:** Players are presented with a huge screen showing 108 random multipliers concealed behind shooting gallery targets (such as a rabbit, a chef hat, a cactus, and so on). A countdown timer starts, and each player must aim and fire a virtual cannon at the target of their option. As soon as time expires, all targets reveal their hidden multipliers, and gamers gather the multiplier related to the target they selected.

3. Pachinko

- **Frequency:** 2 sectors on the wheel.
- **How it works:** Inspired by the traditional Japanese arcade video game, players are required to a radiant Pachinko wall filled with pegs. The host drops a puck from the top of the board, and it bounces randomly down through the pegs before landing in among numerous multiplier zones at the bottom. If the puck lands in a "DOUBLE" zone, all the multipliers at the bottom double in worth, and the puck is dropped again for an even larger payout.

4. Crazy Time

- **Frequency:** 1 sector on the wheel.
- **How it works:** This is the ultimate reward round. The host walks through a red door into a surreal, brightly colored virtual world including an enormous virtual wheel containing 64 segments and 3 flippers (Green, Blue, and Yellow). Gamers pick one of the 3 flippers before the wheel is spun. The wheel can include huge multipliers, "DOUBLE," and "TRIPLE" sections. If the wheel arrive on a double or triple value, all multipliers increase, and the wheel spins again, leading the way for the video game's maximum payments.
