What is Aviator?

At its core, Aviator is a social multiplayer crash game. The property is brilliantly easy: a little red airplane takes off, and as it climbs, a multiplier coefficient boosts. Players put a couple of bets before the round starts and need to cash out before the aircraft inevitably flies away.

If a player cashes out in time, they win their stake multiplied by the existing coefficient. If the aircraft flies away-- or "crashes"-- before they cash out, the bet is lost.

Unlike standard casino games where the result is identified instantly by a random number generator (RNG) concealed behind spinning graphics, Aviator puts the player in the chauffeur's seat of timing. It is a game of nerve, technique, and split-second decision-making.
