What is a Live Casino?

Gamers watch the action unfold by means of high-definition (HD) video streams and interact with the dealer and other players utilizing an integrated live chat feature.

Key Components of a Live Casino Setup

- **The Game Studio:** Professional-grade studios equipped with optimal lighting, soundproofing, and multiple video camera angles.
- **The Dealer/Host:** Trained specialists who manage the video game, connect with players, and ensure fair play.
- **Video Game Control Unit (GCU):** A small device attached to every table that encodes the video broadcast and translates the physical information (like card checks out or wheel spins) into digital info for the software application.
- **Optical Character Recognition (OCR):** Technology that translates physical actions (such as the dealer drawing a card) into data that appears on the gamer's screen in real-time.
