The core appeal of the game depends on the "squander" mechanic, which permits gamers to protect their jackpots at any minute before continuing to the next tile.

How the Game Mechanics Work

1. **Setting the Parameters:** Before the very first click, the player chooses their bet amount and the variety of mines they wish to include in the grid (e.g., 1 to 24 mines in a 25-tile grid).
2. **The Reveal:** The player clicks a tile. If it is a multiplier, the balance increases, and the player can select to "Cash Out" or continue.
3. **The Risk:** If a mine is triggered, the round ends instantly, and the stake is surrendered.
4. **The Multiplier Growth:** The more mines chosen at the start, the higher the multiplier for each successful tile opened.

Understanding Risk vs. Reward

The table listed below shows how different mine counts affect the possible development of a player's initial stake.

Number of Mines	Multiplier (Tile 1)	Multiplier (Tile 5)	Multiplier (Tile 10)
1 Mine	1.04	1.22	1.55
3 Mines	1.13	1.85	3.65
5 Mines	1.23	2.80	9.80
