What is a Mines Casino Game?

At its core, a Mines casino game is a simplified, arcade-style game of chance. It is typically used a grid-- most commonly a 5x5 design including 25 concealed tiles. Beneath these tiles lie an established number of "gems" (or safe areas) and "mines."

Gamers can select to "cash out" their profits at any time before hitting a mine, adding a layer of tactical decision-making to the gameplay.
