

## The Allure of Rare Skins in Counter-Strike 2

Counter-Strike 2 (CS2) has re-ignited the neighborhood's passion for cosmetic antiques. While every weapon skin includes a personal touch to the game, rare skins stand out as the ultimate status symbols. In this post we explore what makes a skin uncommon, examine the present market, highlight a few of the most coveted examples, and respond to common questions about gathering these digital treasures.

### What Makes a Skin "Rare"?

A skin's rarity is identified by a combination of aspects:

1. **Rarity Tier**-- CS2 appoints tiers such as Consumer Grade, Mil-Spec, Restricted, Classified, Covert, and Rare Special Item. The rarer the tier, the less copies exist in the game.
2. **Float Value**-- The float coefficient (0 to 1) measures how close a weapon's wear is to factory-new. Lower floats (e.g., 0.007-- 0.07) are rarer and more valuable.
3. **StatTrak™ & Souvenir**-- StatTrak™ tracks eliminate counts, while Souvenir variations are connected to major tournament maps. Both include uniqueness and increase cost.
4. **Limited Availability**-- Skins released throughout special occasions, promo durations, or as benefits for winning competitive matches often have limited supply.
5. **Pattern/Seed**-- Certain "Blue Gems" or uncommon pattern indexes can command astronomically high rates due to their visual distinctiveness.

Understanding these components helps collectors evaluate the real worth of a rare skin.
