How Live Blackjack Works on Desktop

Live blackjack streams real-time casino action directly to a player's web internet browser or committed desktop client. Using advanced streaming technology, high-definition video cameras capture professional human dealers operating from specialized studio floors or real casino pits.

The Anatomy of a Live Blackjack Studio

1. **The Physical Table:** Standard semi-circular blackjack tables are outfitted with embedded sensors that check out the radio-frequency recognition (RFID) chips embedded in physical playing cards.
2. **The Game Control Unit (GCU):** Every table features a GCU-- a small device attached to the table that encodes the video data being relayed and equates the physical card data into digital information that appears on the player's screen.

3. **Optical Character Recognition (OCR):** OCR innovation converts the physical actions of the dealer (dealing cards, drawing from the shoe) into information, enabling the desktop interface to quickly calculate wins, losses, and presses.
